

# Technology Breakout

## Main Takeaways:

- Clear need to examine and formalize the effective use of breakouts in Zoom.
- GAI Team will work on identifying and implementing a community engagement platform with three primary features:
  - Social networking for out-of-class interaction between students and teachers
  - Resource dissemination
  - Training for teachers
- IRC should no longer be a primary communication channel. Students, faculty, and staff can use the Zoom chat feature, our forthcoming community platform, or another mutually agreed upon channel.
- Need to identify and implement appropriate solutions for various combinations of in-person/remote/hybrid classroom situations.
